# ONLY PURE TEXT-TO-911 INTEGRATED INTO RAPIDSOS

<u>Not all integrations are alike</u>. TEXTBLUE is the only *pure* TCC text-to-911 platform integrated into RapidSOS Portal that includes browser, audio, and queue notification, map integration, and user position.

<u>TEXTBLUE is baked.</u> AGENT511 started delivering text-to-911 in 2014 to Greater Harris County, Texas and added ECC's across North America. Chicago OEMC integrated multimedia in 2010. Texts are sent via 9-1-1 and 911-911 and not 10-digit spam numbers. Automated language translation is supported for over 100+ languages.

Text Features
→ TCC text-to-911 with carrier location and height
→ RapidSOS Portal and Premier Portal
→ Portal inbound text call notification
→ Portal location map integration
→ Text-from-911 via 911-911
→ Reports dashboard with subpoena download
→ Integration with NICE, Eventide, and ECaTS

Multimedia Situational Awareness
Requested and **controlled** by dispatch. Native MMS pictures and recorded video and live streaming video. Live streaming video is shareable with first responders and is fully archived. Accurate device location sis available via 9-1-1 and 911-911. Intrado Viper integration available.
